Annual Report, 1971

Health Department,  
Arnot Hill Park,  
Arnold,  
Nottingham.

December, 1972.

To: The Chairman and Members of the Council

Herewith the Annual Report for 1971.

The state of the public health of the area remains good - and conforms to the requirements of the Department of the Environment.

The estimated mid-year population is 33,130, an increase of 630 over 1970. This figure is 90 less than the increase in the previous year.

The birth rate per 1000 population was 16.4 (corrected) whilst that for England and Wales was 16 per 1000 population. The death rate was 10.6 per 1000 population and compares favourably with the national figure of 11.6. Major causes of death continue to be ischaemic heart disease, cerebro-vascular disease and cancer.

Of the 69 deaths due to ischaemic heart disease, 9 were in people under the age of 55 years.

In August, 1971, smallpox vaccination as a routine was stopped. Only travellers going to smallpox areas are now vaccinated. It is felt that with the low incidence of smallpox in this country, the danger of routine vaccination complications outweigh the chances of contracting the disease.

The cold spell at the end of 1971 brought with it a number of cases of hypothermia - usually in old people living in unfit property. All the cases were dealt with satisfactorily and no deaths occurred from this condition.

Action under Section 47 of the National Assistance Act was considered necessary in two cases. The first case was that of a very old inhabitant who was living alone, was unable to care for herself, in a shack which was unfit for human habitation and which had no means of sanitation. The person concerned refused admission to hospital but before a Court order could be obtained, she was found laid on the floor, having sustained a fractured leg and therefore was admitted to hospital as an emergency where she died soon afterwards.

The second case was a man who was not capable of looking after himself but who finally agreed to admission to part III accommodation and I am happy to say is still alive and well.

These two cases are examples of people living alone, unable to care for themselves and unwilling to receive help from other people; who are lonely yet independent and who, as they grow older, lose contact with the world around them. The Voluntary Organisations in the area do a

marvellous job in this respect, but there are always a number of cases with whom it is impossible to make or maintain contact.

In conclusion, I would like to thank the Chairman and Members of the Public Health Committee for their support during 1971, and also the Clerk and Chief Officers, of the Authority for their help and co-operation throughout the year.

Goldstrough.

These figures are those cases notified to me and give an erroneous impression of the amount of disease in the area. It would indeed be utopia if I could say that in one year we had only 20 cases of infectious disease in a population of 33,130.

If cases of disease are not notified, it makes it impossible to show statistically the effect of vaccines, such as measles, as well as making any attempt at environmental health control impossible.

## VACCINATION & IMMUNISATION

Vaccinations and Immunisations are carried out at the Arnold Health Centre during child welfare sessions by the Department of Medical Officers of the Nottinghamshire County Council.

### MEASLES

578 children were vaccinated against this disease in 1971; many more need to be protected before the true effect can be seen - namely eradication of the disease in our child population.

### POLIOMYELITIS

569 children completed the 3 dose course of oral vaccine.  
658 children received reinforcing doses of vaccine.

### DIPHTHERIA, WHOOPING COUGH AND TETANUS

485 children completed a course of the triple vaccine  
633 children received a reinforcing dose of the vaccine.

### TETANUS ONLY

62 children received a reinforcing dose of this vaccine.

### SMALLPOX VACCINATION

214 children were vaccinated in 1971  
95 children were re-vaccinated during the year

### RUBELLA (GERMAN MEASLES) VACCINATION

386 female school children between the ages of 11-13 years were given the single dose injection.

### B.C.G. (TUBERCULOSIS) VACCINATION

465 children, boys and girls, were offered testing and vaccination if necessary, in 1971.

449 parents consented to testing and vaccination.

442 were skintested, of which 395 children were found to be negative and as a consequence were vaccinated. 47 children were found to be positive and were X-rayed - no child was found to have Tuberculosis.

REPORT OF THE  
CHIEF PUBLIC HEALTH INSPECTOR  
FOR THE YEAR 1971

Health Department,  
Arnot Hill Park,  
Arnold.

To the Chairman and Members of the Council

Mr.Chairman, Ladies and Gentlemen,

I have pleasure in presenting my Report for the year 1971.

SECTION 'D'

SANITARY CIRCUMSTANCES OF THE AREA

WATER

The whole of the district obtains its water from the Nottingham Corporation. The supply has been satisfactory in quality and quantity, has no plumbo solvent action and no complaints have been received.

SWIMMING BATHS

The Public Baths have been well conducted under the able supervision of Mr.W.Watson, Baths Superintendent.

No complaints were received by the Health Department as to unsatisfactory hygiene conditions.

Samples of water submitted to the Public Health Laboratory for bacteriological contamination were satisfactory.

DRAINAGE AND SEWERAGE

Foul sewerage from the whole of the built-up area of the Urban District is dealt with by the Nottingham Corporation at their disposal works, Stoke Bardolph.

RIVERS AND STREAMS

There are no Rivers or Canals within the District.

Five tributary streams drain the area:-

1. Gedling Road and Mapperley confluence via Arno Vale Road and Thackeray's Lane
2. Coppice Road confluence via Bentwell Avenue and Brookfield Road
3. Kingswell confluence via Nottingham Road Recreation Ground
4. Calverton Road confluence via Front Street and Nottingham Road
5. Redhill confluence via Mansfield Road to Jubilee Road.

All converge into the Day Brook which in turn discharges into the River Leen at Basford in the City of Nottingham, via the Valley Road Playing Fields.

### CLOSET ACCOMMODATION

The position throughout the district generally is in my opinion entirely satisfactory in that a water carriage system operates to the extent of 100 per cent.

No more than 6 Pail Closets remain in outlying parts of the District.

### CESSPOOLS

There are approximately 70 cesspools in the outlying parts of the Urban District, on the East, North East and Northern boundaries, where public sewers are not available. These are emptied by the Council on request twice a year (Spring and Autumn) at a charge of £1.50 per 800 gallons. An income of £277.00 was received during the year for emptying cesspools; expenditure was £490.64.

### PUBLIC HEALTH ACT, 1936, SECTION 75 (1) DUSTBINS

The system of replacing defective dustbins is as follows:-

Defective bins are reported by the refuse collectors; a letter is then sent to the owner requesting replacement of the defective bin. After a lapse of a reasonable time, a Statutory Notice is served on the owner giving him 28 days in which to provide same. 5 Statutory Notices were served during the year and 1 dustbin supplied in default.

Unsatisfactory containers such as wash-tubs, drums etc., appear from time to time. Where this happens, the premises are visited and the substitute receptacle is ultimately replaced for one of an approved pattern.

Two hundred and twenty two new dustbins were provided at 51 private premises, 171 Council houses and other Council premises, 51 Preliminary Notices were served.
